

A Post-COVID Workforce

From Crisis Management to Workforce Resilience

CareRev combines the power of technology and an on-demand staffing model to help health systems build a resilient workforce that's prepared for anything.

1

Operate at the top of license.

By giving you direct access to a local, flexible talent pool of RNs, CNAs, MAs, and techs, we help you diversify your team and skill mix. This ensures clinicians are engaged and working to their highest potential.

2

Staff at the optimal level.

Once you've determined the right skill mix, quickly match staffing levels with patient demand. CareRev's on-demand workforce model enables you to adjust with the ebb and flow of demand without driving up costs.

3

Take control of labor costs.

When you reduce understaffing and overspending, you reduce labor costs. A local, flexible workforce allows you to minimize agency fees and overtime payments, and most importantly, build resilience for the future.
